Professional Summary

Computer Science and Engineering graduate proficient in Python, Java, Spring Boot, Spring Security, REST APIs, PostgreSQL, SQL, and Git, with a strong foundation in object-oriented programming, database management, problem-solving, data structure and backend development. Interested in backend engineering, system design, cloud technologies, and DevOps, with a focus on building secure and scalable applications

Education

B.Tech in Computer Science and Engineering

2022–2026

Vimal Jyothi Engineering College

CGPA: 7.22/10

School

2022, 2020

Class XII: 92.17% – Mattannur Higher Secondary School

Class X: 90% (Full A+ in all subjects)– Mattannur Higher Secondary School

Technical Skills

Languages: Python, Java, SQL, HTML, CSS

Core Concepts: Data Structures, OOP, DBMS

Frameworks & Tools: SpringBoot, Git, GitHub, Postman

Projects

Digital Banking (Java, Spring Boot, PostgreSQL)

Jun 2026 – Aug 2026

- Developed a secure digital banking backend using Java and Spring Boot, implementing RESTful APIs for user authentication, customer profiles, and account management.
- Implemented JWT-based authentication, Spring Security, BCrypt password hashing, input validation, centralized exception handling, and account ownership authorization.
- Designed and integrated a PostgreSQL database using JPA/Hibernate and implemented password management, account creation, account retrieval, and API documentation using Swagger/OpenAPI.
- Built using Java, Spring Boot, Spring Security, PostgreSQL, JPA/Hibernate, JWT, Maven, Git, and Docker.

Smart Home Energy Optimization System (IoT + LSTM)

Oct 2025 – Mar 2026

- Developed an IoT-based smart home energy optimization system using ESP32 for real-time energy monitoring.
- Built a Firebase dashboard to visualize live energy consumption and processed time-series data to develop an LSTM forecasting model.
- Tech Stack: Python, TensorFlow, Firebase, ESP32, Pandas

Student Record Management API (Java, Spring Boot, PostgreSQL)

- Developed a Spring Boot REST API for managing students, courses, and enrollments using Java, Spring Data JPA, Hibernate, and PostgreSQL.
- Implemented CRUD operations, DTO-based data handling, validation, global exception handling, and database constraints with appropriate HTTP status codes.
- Built search, filtering, sorting, and pagination functionality using Spring Data JPA derived queries and Pageable.

Internship Experience

Full Stack Intern – Techcake Cloud Innovations LLP

Jan 2026

- Developed To-Do List and Blog applications with CRUD functionality.
- Applied SDLC practices including development, testing, debugging and maintenance.
- Strengthened software development and problem-solving skills through hands-on project implementation.

Production Support Intern – Caytm Technologies (R & D for CRED.AI)

Jun 2026 - Aug 2026

- Used AWS services such as EC2, CloudWatch, IAM, VPC, and related monitoring tools for operational support.
- Worked with SQL and databases to investigate issues, validate data, and troubleshoot application-related problems.
- Gained practical exposure to cloud operations, monitoring and production environments.

Additional Information

Languages: English (Fluent), Malayalam (Native), Hindi (Conversational)
